Comes standard with integrated CO₂ indicator to verify exhaled CO₂.

Integrated Manometer Series:

SC7101, SC6101, SC8101, SC9101

Standard Series:

SC7001, SC6001, SC8001, SC9001

Ventlab

HYPERINFLATION SYSTEMS

- Use of an integrated pressure manometer promotes proper pressure delivery and helps reduce the risk of barotrauma and/or VAP
- Standard stay-put dial for achieving targeted static pressure
- Pleated breathing bags: ¼, ½, 1, 2, 3 Liters
- Masks and safety components available

Hyperinflation

*Integrated Manometer Series:
HS4000*

*Standard Series:
HS1000*

MASKS

- Inflatable and non-inflatable styles
- Wide variety of sizes
- Features soft seal with effective seating

Vent Mask™

Premium inflatable anesthesia mask. Superior ergonomic cushion design for an optimal seal with minimum pressure.

Vent Mask™ II

Air-filled anesthesia mask. Pliable, ultra-thin walls and low-pressure seal for excellent seating.

Soft Seal™ Mask

Non-inflatable anesthesia mask. Pliable cushion; economical choice.

ACCESSORIES

MRI Transport Circuits

9' Expandable tubing; with/without filter.

MRI Conditional VC1000 Series

PEEP Valve

Adjustable, 5-20cm H2O

VP700 Series
